WORKSHOP WEEK 8

CONTENTS

1

**Lecture Week 7
Recap**

2

Pass Task P7

3

**Distinction Task
D1**

DIRECTIONS

The tutors help you recap the contents of Lecture Week 7

The tutors help you complete the pass task P7

The tutors help you complete the distinction task D1

Let's begin ...

AI & ETHICS ACTIVITY

AI SYSTEMS AND TRUSTWORTHINESS (45 MIN)

REQUIRED READING: [CHAPTER 1 – ARTIFICIAL INTELLIGENCE: A PERSPECTIVE FROM THE FIELD](#)

Goal: Understand how technical properties of AI systems relate to “trustworthy AI”.

Group Task (3–5 students)

Select TWO concepts discussed in the chapter (e.g., reasoning, explainability, robustness, reliability).

- What technical problem does each concept address?
- What limitation or risk does it attempt to reduce?

Analysis Discussion

- Why is technical accuracy alone insufficient for trust?
- What contributes most to trustworthiness?
- What is hardest to achieve in practice?

Output (final 5 min): One group statement identifying the most critical requirement for trustworthy AI.
