Lecture Week 8 Recap

2

High Distinction Task HD1

DIRECTIONS

The tutors help you recap the contents of Lecture Week 8

The tutors help you complete the high distinction task HD1

Let's begin ...

AI & ETHICS ACTIVITY

FAIRNESS AS A SOCIO-TECHNICAL CONCEPT (45 MIN)

REQUIRED READING: [CHAPTER 4 – FAIRNESS AND *ARTIFICIAL INTELLIGENCE*](#)

Goal: Examine why fairness in AI cannot be reduced to technical metrics alone.

Group Task (3-5 students)

From the chapter, define in your own words:

- procedural fairness
- substantive fairness
- fairness as non-arbitrariness

Concept Comparison

Discuss:

- How procedural and substantive fairness lead to different outcomes.
- Why the authors caution against purely technical “fairness by design”.

Critical Discussion

Identify:

- assumptions behind algorithmic fairness solutions
- social factors that cannot be captured technically.

Output (final 5 min)

One limitation of technical fairness approaches.
